Proposal 1

Figure 1 Logo of The Johannesburg Dream Centre

1. Organisation Overview

Name: The Johannesburg Dream Centre

Brief History: Established in 2014, The Johannesburg Dream Centre began as a modest poverty alleviation initiative and has grown into a comprehensive community hub serving over 500 families annually and reaching 2,500+ community members.

Mission Statement: "Alleviating poverty by means of a multi-level approach aimed at working to meet immediate needs, empowering people living in poverty and inspiring them to work towards a better quality of life."

Vision Statement: "To change the atmosphere of Johannesburg to one in which poverty is drastically reduced and there is hope for a brighter future."

Target Audience: Underprivileged families, youth (ages 10–18), senior citizens, job seekers in Gauteng, as well as corporate donors, local sponsors, and volunteers.

2. Website Goals and Objectives

Specific Goals:

Increase community engagement and enrolment across youth, adult education, and computer literacy programs.

Streamline online donations (e.g., direct monetary support and project-based donations like "Wrapped in Love").

Simplify volunteer and partnership recruitment using structured enquiry forms.

Key Performance Indicators (KPIs):

A 35% increase in online enquiry form submissions (volunteers & course applicants) within 6 months.

A 25% increase in direct online monetary donations through integrated payment channels.

Reduced bounce rate under 45% through improved mobile responsiveness and user experience.

3. Current Website Analysis

Strengths

Clear navigation structure across core pages (Home, About Us, Services, Enquiry, Contact).

Comprehensive detailing of community achievements, leadership profiles, operating hours, and location data.

Weaknesses & Areas for Improvement

HTML Syntax Errors: The source code contains syntax typos, such as misspelled form elements (<from> instead of <form>), improper list tags (<il> instead of), and redundant nested anchor links (<a ...>).

Formatting & Usability: Mixed heading tags (<P><h2>Shop</h2></P>), missing dynamic e-commerce cart functionality for items like scarves, and non-responsive static image dimensions.

Visual Appeal: Lacks modern styling frameworks, CSS layout grids, and interactive form controls.

4. Proposed Website Features and Functionality

Homepage (index.html): Hero header with quick action CTA buttons ("View Programs" & "Get Involved"), mission highlight, and impact cards.

About Us (about us.html): Interactive timeline of history, leadership team profiles with imagery, and verified BEE Level 1 achievements list.

Services & Shop (services.html): Categorized schedule grid (Youth, Adult ABET, Computer Literacy, Senior Support) alongside an integrated e-commerce shop for product and monetary donations.

Enquiry & Volunteer Portal (enquiry.html): Validated contact form with dropdown categorization for sponsorships, volunteering, and course participation.

Contact & Location (contact.html): Embedded Google Maps location, opening hours breakdown, and direct messaging functionality.

5. Design and User Experience

Colour Scheme: Primary Navy Blue (#1B365D), Community Gold/Yellow (#F2A900), Neutral Crisp White (#FFFFFF), and Charcoal Text (#333333).

Typography: Modern, clean sans-serif typography hierarchy using Aptos / Arial for body copy (11pt / 16px, 1.5-line height) and bold headings (##, ###) for scan ability.

Layout and Design: Mobile-first, responsive flexbox/grid layout providing intuitive top-bar navigation, accessible contrast ratios, and distinct content sections separated by visual cards.

THE JOHANNESBURG DREAM CENTRE – WIREFRAMES

6. Technical Requirements

Domain & Hosting: Dedicated.org.za domain hosting (e.g., johannesburgdreamcentre.org.za) hosted on cloud infrastructure with SSL encryption.

Languages & Frameworks: Semantic HTML5, CSS3 (Custom Properties & Flexbox), and JavaScript (ES6+) for form validation and shopping cart interactions.

7. Timeline and Milestones

Milestone	Task Description	Target Completion
Phase 1	Requirement Analysis, Wireframing & Proposal Finalization	Week 1 - 2
Phase 2	HTML5 Semantic Restructuring & CSS Responsive Layout Setup	Week 3 - 4
Phase 3	Form Logic, Donation Cart JavaScript, & Map Embed Integration	Week 5 - 6
Phase 4	Testing, Accessibility Audits, Bug Fixes & Final Deployment	Week 7 - 8

8. Budget

Item	Description	Estimated Cost (ZAR)
Domain Registration & Hosting	Annual.org.za domain + SSL + Linux Web Hosting	R 1,200
UI/UX Design & Front-End Dev	Responsive HTML5/CSS3/JS website development	R 8,500
Testing & Integration	Payment gateway integration & mobile cross-browser testing	R 2,500
Maintenance & Security	Annual security updates, backups, and content updates	R 2,800
Total Estimated Budget		R 15,000

Proposal 2

1. Organisation Overview

Name: Blue Cub Transport Service

Brief History: Founded to provide safe, reliable, and accessible commuter transit across urban and regional routes, Blue Cub Transport Service operates a modern fleet of passenger minibuses (taxis) and high-capacity luxury coaches/buses. The company specializes in daily commuter routes, corporate staff transfers, group charters, and airport transfers.

Mission Statement: "To deliver dependable, affordable, and safe passenger transport across bus and taxi networks using modern technology and customer-first service."

Vision Statement: "To become the leading integrated public and private transit network in the region, recognized for safety, punctuality, and seamless digital booking."

Target Audience: Daily city commuters, corporate clients requiring staff shuttle services, event organizers, school trip coordinators, and long-distance travel passengers.

2. Website Goals and Objectives

Specific Goals:

Provide an easy-to-use digital portal for viewing live bus/taxi routes, timetables, and stop locations.

Implement an online booking and ticket reservation engine for bus charter and private taxi transfers.

Increase corporate contract enquiries for daily employee transport solutions.

Key Performance Indicators (KPIs):

Achieve 500+ online ticket and charter quote requests within the first 3 months of launch.

Increase corporate transit inquiry conversion rate by 30%.

Maintain an average site page load time of under 2.5 seconds on mobile devices.

3. Current Website Analysis

Strengths

Established brand reputation for fleet safety, experienced drivers, and wide route coverage.

High customer interest in online schedule checks and digital ticket purchases.

Weaknesses & Areas for Improvement

Outdated Digital Presence: The existing web presence relies on basic static information without interactive route search or booking tools.

Mobile Experience: Lacks a mobile-first responsive layout, making schedule viewing difficult on smartphones.

Missing Fleet/Pricing Transparency: Passengers cannot view live fares, vehicle capabilities, or charter request forms online.

4. Proposed Website Features and Functionality

Homepage: Dynamic hero banner featuring interactive route search, fleet highlights (Buses & Taxis), safety certifications, and emergency contact details.

Routes & Timetables Page: Searchable index of daily bus schedules, taxi pick-up zones, route maps, and estimated transit times.

Fleet & Services Page: Visual showcase of the bus and minibus taxi fleet, detailing capacity, onboard amenities (Wi-Fi, air conditioning), and charter options.

Booking & Quote Request Engine: Form wizard allowing passengers to book point-to-point taxi rides or request custom bus charter quotes.

Contact & Support Page: Integrated enquiry form, customer service hotline (+27 hotline), and branch office locations with interactive maps.

5. Design and User Experience

Colour Scheme: Primary Transport Blue (#0056B3), Cub Accent Cyan (#00A8E8), Charcoal Gray (#2B2D42), and Crisp Clean White (#FFFFFF).

Typography: Aptos / Roboto clean sans-serif font hierarchy for strong readability across mobile and desktop displays (11pt / 16px body, 1.5-line height).

Layout and Design: Mobile-first responsive grid system with clear visual buttons, high-contrast schedule tables, and intuitive navigation bars.

Low-Fidelity Wireframe Diagram:

6. Technical Requirements

Domain & Hosting: co.za domain (e.g., bluecubtransport.co.za) hosted on a secure cloud server with active SSL/TLS certificates.

Languages & Frameworks: Semantic HTML5, CSS3 (CSS Grid & Flexbox), vanilla JavaScript (ES6) for search filtering and form validation, integrated with Google Maps API for route visualizers.

7. Timeline and Milestone

Milestone	Task Description	Target Completion
Phase 1	Project Scope, Wireframing & Proposal Approval	Week 1 - 2
Phase 2	Responsive HTML5 Structure & CSS Styling Implementation	Week 3 - 4
Phase 3	Interactive Route Search, Booking Logic & Map Integration	Week 5 - 6
Phase 4	Mobile Testing, Performance Optimization & Site Deployment	Week 7 - 8

8. Budget

Item	Description	Estimated Cost (ZAR)
Domain Registration & Cloud Hosting	Annual.co.za domain + SSL Certificate + Hosting	R 1,500
UI/UX & Front-End Development	Custom responsive website design (HTML/CSS/JS)	R 9,500
Interactive Features & Maps API	Route lookup tool & Google Maps API integration	R 3,000
Maintenance & Security	Annual security patches, performance monitoring & updates	R 3,000
Total Estimated Budget		R 17,000
